IPHONE FACE ID DOT PROJECTOR & FLOOD ILLUMINATOR LINE MAP

TrueDepth Biometric Sensor Repair & MOSFET Bypass | Sheet 1 of 1

DOT PROJECTOR VCSEL LASER CIRCUIT

Vertical-Cavity Surface-Emitting Laser Diagnostics

VDD_LASER Supply: 3.3V power line from PMU | Diode Mode: 430mV

I2C Control Line: 1.8V encrypted handshake directly with Secure Enclave

DOE Glass Prism Sensor: Capacitive safety sensor detecting detached lens

Safety Interlock: If DOE prism shifts by > 0.02mm, internal MOSFET fuses open

MOSFET Bypass: Micro-jumper from Drain to Source pad with 0.01mm enamelled wire

Warning: Always work under ESD mat; static electricity burns infrared laser chip instantly

CONFIDENTIAL - SALEN MOBILE GURU CHIP-LEVEL HARDWARE LAB
